Retail Markdown Strategy Report

Generated 2026-10-29 22:03 | all amounts in SEK

SKUs analysed	Needs approval	Average markdown
100	**39**	**18.4%**
67 with a price change	markdown of 15% or more	largest 24.9%

Capital tied up	Recoverable	Revenue given up
5 828 843 SEK	**8 775 128 SEK**	**2 172 630 SEK**
at cost, marked-down SKUs	at recommended prices	versus current prices

Executive summary

This run reviewed **100 products (SKUs)** and recommends lowering the price of **67**. The stock in those products cost **5 828 843 SEK** to buy and would bring in about **8 775 128 SEK** if all of it sells at the new prices. The price reductions give up **2 172 630 SEK** of revenue compared with today's prices.

What was done

Each product was checked on four things: how long it has been in stock, how many weeks the stock on hand would last at the recent sales pace, what competitors charge, and whether the price still leaves the minimum margin required for its department. The result: **30 SKUs keep** the current price; **51 get a markdown** (a price reduction); **16 go** on clearance (a larger reduction for old stock that sells slowly); **3 need** a manual look because today's price is already below the minimum margin.

Why prices change, or stay

Among the price reductions, a competitor sells the same item for less in **56** of the 67, and the stock is old, or large compared with how fast it sells, in **67** (some products have both reasons). **23** reductions were held back by the 25% limit per run. Of the 30 products that keep their price, **21** sell quickly and are left alone, **8** had a price change too recently, **1** has no stock.

What it means financially

Selling this stock at the new prices would still leave a gross margin of **2 946 285 SEK** (33.6% of the revenue) after the 5 828 843 SEK it cost to buy. The average price reduction is **18.4%** per product (the largest is 24.9%), which is 19.8% of the current selling value of this stock. These figures assume all units are sold; they do not say how long that will take.

Where the impact is

Furniture carries the largest share of the revenue given up (684 940 SEK, 32% of the total), followed by **Home** (421 630 SEK, 19%). The deepest reductions are Height-Adjustable Desk (SKU-2185, 24.9%); Height-Adjustable Desk (SKU-2222, 24.9%); 3-Person Dome Tent (SKU-2777, 24.9%).

What needs attention

- **39** of the 67 price reductions (58%) are 15% or more and need human approval before any price is changed. They are flagged in the Pricing actions table.
- **3 products are** already priced below the minimum margin and need a decision from the pricing team: Bluetooth Speaker Mini (SKU-1186), Ergonomic Mesh Office Chair (SKU-2000), Down Sleeping Bag -10C (SKU-2925).
- **5 rows have** data warnings (for example missing competitor prices or product IDs). They were still priced; see Data quality.
- **8 product variants are** overstocked in one store while another store is nearly sold out. Moving stock between stores may avoid some of the discounting (see Knowledge graph insights).

How reliable this is

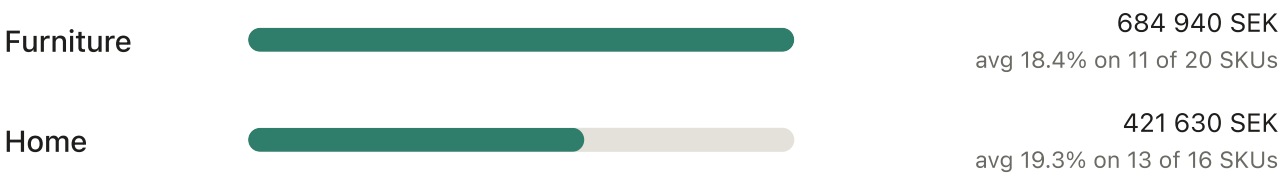

All prices are calculated by fixed rules, not by AI. The rules never raise a price, never reduce a price below the department's minimum margin, and limit any single reduction to 25% per run. As a second check, every decision was recomputed against the written pricing policy (version 1.1, commit 2430b67, 3 documents): no violations found. Nothing is changed automatically: these are recommendations for the pricing team.

How to read this report. Markdown: a price reduction. Clearance: a larger reduction for old stock that sells slowly. Weeks of cover: how many weeks the stock on hand would last at the recent sales pace. Capital tied up: what the stock cost to buy. Recoverable: the cash the stock would bring in at the recommended prices. Revenue given up: the difference between today's prices and the recommended prices.

Action mix

Revenue given up by department

Outdoor		398 700 SEK avg 19.4% on 10 of 14 SKUs
Electronics		381 970 SEK avg 19.6% on 16 of 27 SKUs
Sports		271 300 SEK avg 15.7% on 14 of 17 SKUs
Toys		14 090 SEK avg 16.3% on 3 of 6 SKUs

Policy review

Policy audit (policy v1.1, commit 2430b67, 3 documents): 100 SKU decisions recomputed against the policy parameters. No violations.

Clause review (AI-assisted, citations verified): 12 of 70 flagged SKUs reviewed; 12 written by the local LLM, 0 replaced by the list of retrieved clauses because the text failed verification.

SKU	Action	Clauses retrieved	Policy note
SKU-1186	REVIEW	P-4.2, P-4.3, P-2.1	The clause [P-4.2] requires a human action, which is sign-off from the category manager, for the clearance action in the Electronics department.
SKU-2000	REVIEW	P-4.2, P-1.2, P-2.1	The policy issue requires human action from the category manager, as clause [P-4.2] states that any clearance action in the Furniture department needs sign-off from the category manager, regardless of the size of the markdown.
SKU-2925	REVIEW	P-8.2, P-2.1, P-6.2	The policy issue requires human action at [P-2.1] and [P-6.2], as the current price of 829 SEK does not meet the minimum markup requirement for the Outdoor department (20%), and the combined stock-pressure markdown exceeds the 30% limit.
SKU-2185	CLEARANCE	P-4.2, P-4.4, P-8.1	The action that requires a human action is [P-4.2], which requires sign-off from the category manager. The category manager needs to approve the clearance action.
SKU-2777	CLEARANCE	P-4.4, P-8.1, P-5.2	The action required for this decision is approval from the pricing manager, specifically for the SKU-2777 (3-Person Dome Tent) with more than 200 days in stock. This is due to the [P-5.2] Cooldown exception clause.

SKU-2814	CLEARANCE	P-4.4, P-8.1, P-5.2	The action required for this decision is approval from the pricing manager, specifically for the SKU-2814 (3-Person Dome Tent) with more than 200 days in stock. This is due to the [P-5.2] Cooldown exception clause.
SKU-2851	CLEARANCE	P-4.4, P-8.1, P-5.2	The action required for this decision is approval from the pricing manager, specifically for the SKU-2851 (3-Person Dome Tent) with more than 200 days in stock. This is due to the [P-5.2] Cooldown exception clause.
SKU-1075	CLEARANCE	P-4.2, P-8.1, P-5.2	The action required for this decision is approval from the pricing manager, specifically for the SKU-1075 item with more than 200 days in stock. This is due to the [P-5.2] Cooldown exception clause.
SKU-1556	CLEARANCE	P-4.2, P-4.4, P-8.1	The action [P-4.2] requires a human action, which is sign-off from the category manager.
SKU-2999	CLEARANCE	P-8.2, P-5.2, P-8.1	The cooldown exception [P-5.2] requires a human action for this decision, as it needs approval from the pricing manager. The approval is needed because the item (SKU-2999) has more than 200 days in stock (169 days) and its stock cover exceeds 26 weeks (121.1 weeks).
SKU-3332	CLEARANCE	P-5.2, P-8.1, P-4.1	The approval threshold [P-4.1] requires a human action, which is approval from the pricing manager, as the markdown of 15% or more needs human approval before the price is changed.
SKU-3369	CLEARANCE	P-5.2, P-8.1, P-4.1	The approval threshold [P-4.1] requires a human action, which is approval from the pricing manager, as the markdown of 15% or more needs human approval before the price is changed.
